

1) GET

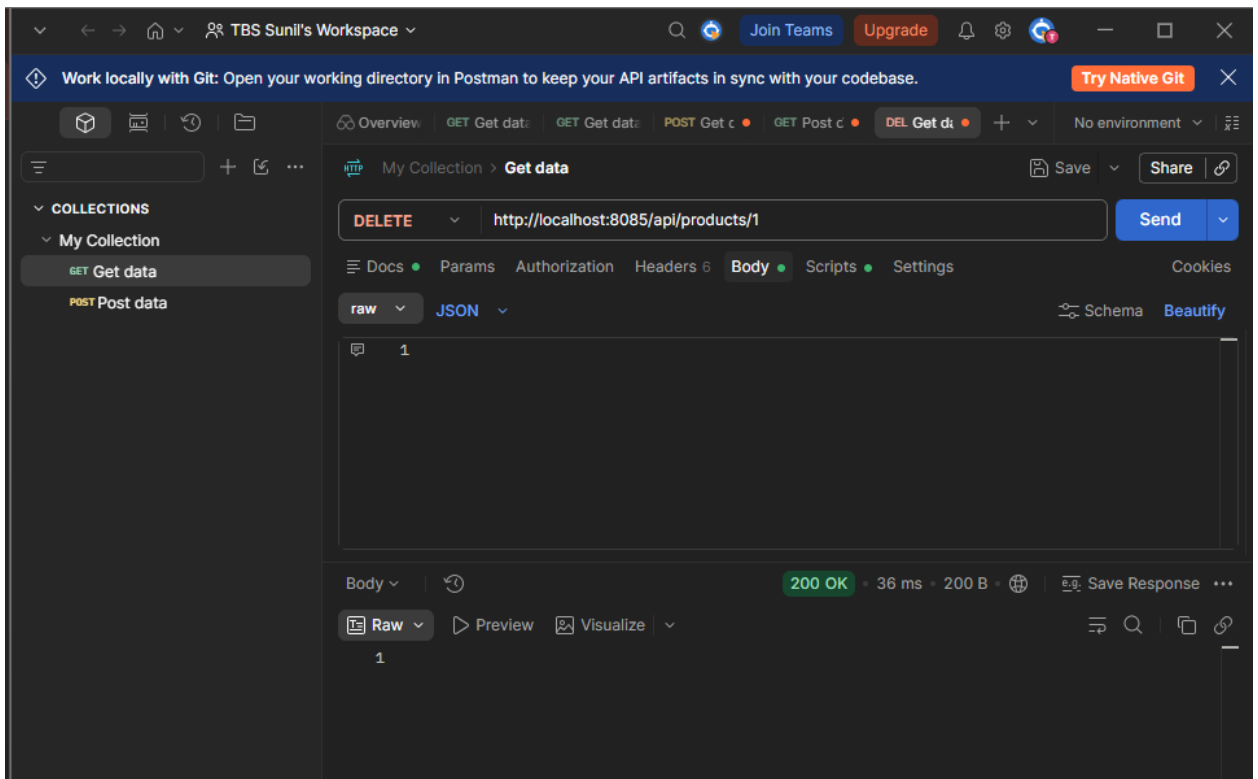

2) POST

3) PUT

4) DELETE

[illegible]

The screenshot shows a VS Code editor with a Vite + React project. The Explorer sidebar on the left displays the file structure, including folders like 'week09' and 'components'. The main editor area shows a 'Product List' page with a list of products: Smartphone - \$999, Tablet - \$799, Laptop - \$1200, and Keyboard - \$2500. Each item has a 'Delete' button next to it. The bottom panel shows the Terminal with the command 'npm run dev' and its output, indicating the application is running on http://localhost:5173/.
